HyFlex® 11-900 Glove

Keep Oil Out And Safety In.

Superior abrasion resistance.

When handling very abrasive small to medium parts in the work environment, the HyFlex® 11-900 glove meets the challenge. The nitrile coating provides excellent dry grip and also repels oil. This enables workers to safely, efficiently and comfortably perform a broad range of applications.

Protection that's also comfortable.

The natural, ergonomic design of the HyFlex 11-900 glove makes it more likely to be worn by your workers. That means they'll be protecting their hands, maximizing productivity and lowering on-the-job injuries and the costs associated with them.
